**Project Places Copies of Lumberjack Online, Enabling Global Access To Primary Sources**

By Project Staff

The Lumberjack Digitization Project was made possible through a grant provided by the GI 2025 initiative. In December 2018, the HSU Library submitted the proposal for the project requesting $10,000 to fund student employment for the duration of the spring semester. The proposal, written by Teaching and Learning Librarian Keelye Wilson, Cyril Oberlander, and Garrett Purchio, enabled the Library to hire student assistants for the project. The students were hired in late January and began working in early February. The project is slated to conclude in late May.

The Library sincerely thanks the Provost’s Office for providing the funding for the project. These funds enabled the Library to hire student employees for a project that increases access to primary sources and creates new opportunities for researchers. Additionally, the students hired were able to learn valuable skills that will help them in their future endeavors.

**LUMBERJACK NEWSPAPER DIGITIZATION PROJECT**
