Background

On September 29, 2006, Pacific Gas and Electric Company (PG&E) submitted an AFC to construct and operate a nominal 163 megawatt (MW) power plant consisting of ten natural gas and diesel dual fuel reciprocating engine-generator units rated at 16.3 MW each. The proposed project site is located at 1000 King Salmon Avenue, approximately 3 miles south of the City of Eureka, Humboldt County. The facility would be located on 5.4 acres within a 143-acre parcel currently occupied by the existing PG&E Humboldt Bay Power Plant. The Energy Commission is responsible for reviewing and ultimately approving or denying all applications for thermal electric power plants, with a capacity of 50 MW or greater, proposed for construction in California.
