Relics of Early Indian Days Unearthed in Humboldt

Artifacts and Bones May Shed New Light on Past Humboldt Indian Culture

By MELODIO MELHOR

A relatively unknown Indian burial ground near Freshwater lagoon was recently uncovered by the highway department while building a new highway along the coast. The site, which is located on the north side of the lagoon, was discovered by a team of surveyors who were mapping the area for a new road. The site, which is surrounded by dense woods, was undisturbed by earlier surveys or development.

The site was discovered by a team of surveyors who were mapping the area for a new road. The site, which is located on the north side of the lagoon, was recently uncovered by the highway department while building a new highway along the coast. The site, which is surrounded by dense woods, was undisturbed by earlier surveys or development.

The surveyors were making their way through the area when they noticed an unusual mound. They decided to investigate and soon discovered a large burial site. The site contained several artifacts and bones, including stone tools, bone needles, and turtle shells. These artifacts provide valuable information about the lives of the people who lived in the area hundreds of years ago.

The site is of particular interest because it is believed to be one of the largest and most important Indian burial grounds in the region. The discovery of this site is significant because it provides insight into the lives of the people who lived in the area hundreds of years ago.

The site is located near the site of the old Indian village of Yurok, which was the site of a large village and ceremonial center. The village was destroyed by the Spanish in the 18th century, and the site was abandoned.

The site contains several artifacts and bones, including stone tools, bone needles, and turtle shells. These artifacts provide valuable information about the lives of the people who lived in the area hundreds of years ago.
